	Scenix SSR Clears (7030, 7031, 7032)	Createx Clear Coats (5620, 5621, 5622)
Performance	<ul style="list-style-type: none"> - Createx's most durable brand of clears - Suitable for large-scale, long-term exterior paintjobs - Cures to a hard coating with high block resistance - Sandable & Buffable. Polish 7030 to a high gloss clear. - Excellent Self-leveling - Fast Drying - Scenix 7030 Gloss Clear is a higher gloss clear compared with 5620 Createx Gloss Clear - Compatible with all Createx Colors paints - Excellent adhesion direct to any substrate* 	<ul style="list-style-type: none"> - Durable, excellent for protecting artwork & hobby - Excellent adhesion direct to plastic - Cures semi-hard. Less mar resistant compared to Scenix SSR Clears. - Scratches from sanding cannot be polished or buffed out. - Self-leveling - Airbrush friendly - Brushes easy without leaving brush marks - For use with Createx Airbrush Colors, Illustration Colors, Wicked Colors & Auto Air Colors. Not for top-coating <i>candy₂O</i> (use 4040 Bleed Checker first) or Scenix Mural & Theme Paint

* Scenix SSR Clears & Createx Clear Coats may be applied direct to most any substrate as a transparent primer / adhesion promoter. Of the two, Scenix SSR Clear adheres better, which may help when painting hard plastics or unusual substrates that are hard to paint.

- Scenix SSR Clears & Createx Clear Coats may both be applied direct to aluminum & galvanized metal. Neither should be applied to untreated metal due to the risk of corrosion. Apply first a direct-to-metal primer such as a self-etching epoxy primer.

Refer to Scenix SSR Clear & Createx Clear Coats Technical Data Sheet for more product information.
