

# Scenix SSR Clears

The Water-Based  
**REVOLUTION**  
Continues!

SCENIX SSR CLEARS

SSR Clears are industrial grade clears made with a hybridized acrylic-urethane:

- Available in Gloss, Satin and Matte
- Superior Durability and Chemical Resistance. Resin contains aliphatic urethane.
- Exceptional adhesion. Our best plastic adhesion promoter.
- Non-caustic. Will not break-down other materials making them compatible with many substrates, composites and layering.
- ASTM E84 Class A Fire Rating

SSR stands for Sun Screen Resistant, meaning SSR clears will not re-emulsify when exposed to chemicals such as the solvents found in sunscreen. The result is a long lasting clear that doesn't yellow or streak even in tough environments like hand-rails and customer reach areas.

- Compatible with all Createx paints

SSR Clears available sizes:  
32 oz. & 128 oz.
